Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fail to teach or suggest, alone or in combination, a method and apparatus for dynamically correcting rotational distortion of a raster scan in a cathode ray tube including the limitations: "generating a first correction magnetic flux component; adding the first correction magnetic flux to a first magnetic vertical deflection magnetic flux component in real time; generating a second correction magnetic flux component, generating a resultant vertical deflection magnetic flux by adding the second correction magnetic flux to a second vertical deflection magnetic flux component in real time wherein the resultant magnetic flux is a substantially free of rotational distortions." as claimed in claims 1 and 5. It is for these reasons in combination with all the other limitations in the independent claims 1 and 5, and in light of the terminal disclaimer filed on 9/11/06 that claims 1-8 are allowable over the prior art of record.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
